

## The Growing Data Conundrum

Public and private sector enterprises are realizing that data is the new currency in an increasingly digital world. However, most organizations are often uncertain about what data they have, where it's stored, where it came from, or how it's being managed. That places these organizations at greater risk of data breaches and non-compliance with data privacy regulations including GDPR and CCPA.

Most enterprises have deployed standalone solutions for different use data cases such as data governance, data privacy, data protection, cyber readiness, and litigation readiness. This siloed solution approach is difficult to manage, prone to errors, and needlessly expensive.

## The Answer: Advantek Digital Management Platform

To address these data challenges, Advantek has released the first Digital Management Platform for data privacy, data governance, data protection, cyber readiness, litigation readiness, and records management. Our Platform helps companies discover, organize, and protect data in an automated manner to achieve continuous compliance and data protection reducing the cost and errors associated with a siloed approach. Only Advantek Digital Management Platform offers a unified solution that provides board level visibility across an organization's entire data risk and compliance posture solution.

**Discover + Organize + Protect + Repeat**

## Increase data governance maturity and reduce security risk

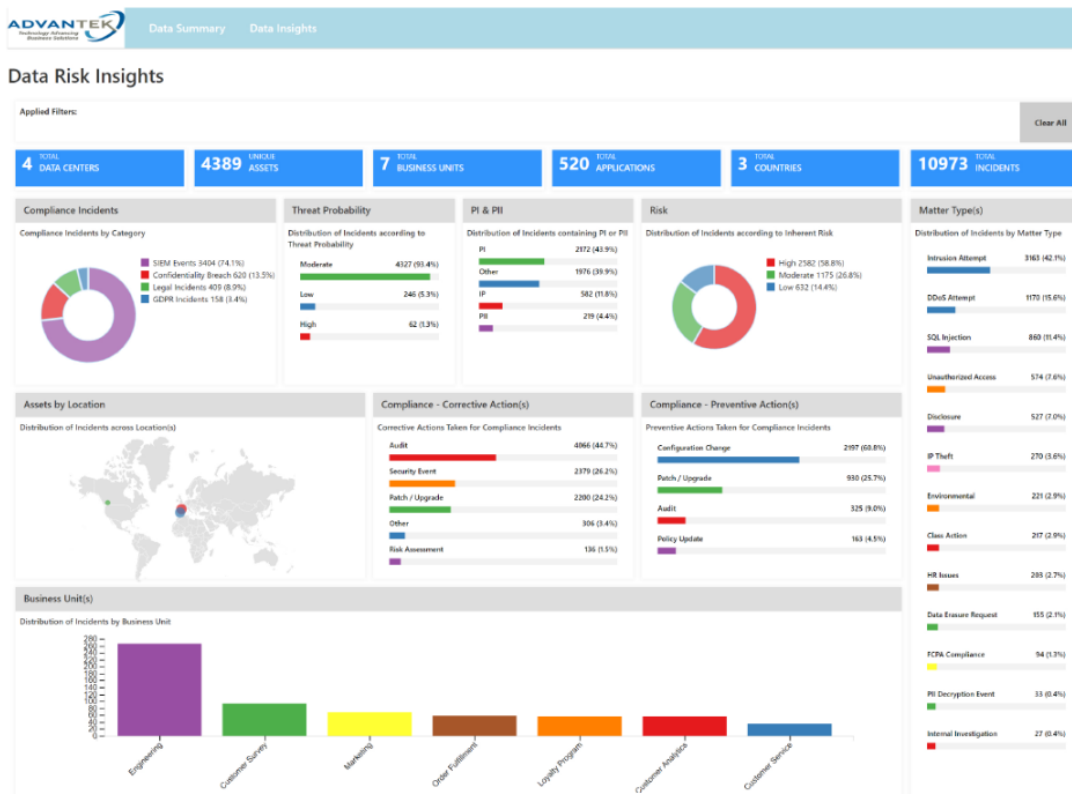

Advantek rapidly increases our client's data governance maturity level and significantly reduces the risk of data breaches and non-compliance by enabling organizations to gain full control over their globally dispersed information assets regardless of data source, location, type (e.g. PII, proprietary) or format (structured or unstructured).

## Automate & operationalize data privacy, data governance, data protection

Advantek Digital Management Platform helps organizations automate and operationalize data privacy, data governance, and data protection. Powered by artificial intelligence, machine learning, and GPU processing (that's 350 times faster than a regular CPU), our Platform constantly monitors and adjusts to changes in regulations and threat landscape.

## Greater visibility and control

Advantek Digital Management Platform easily integrates into your existing environment and through its open architecture and APIs captures information from other systems including market leading SIEMs and reporting tools. Aggregated information is displayed through Advantek's executive dashboard in an intuitive manner.
